

- (c) the purpose for which lots are used.

On the basis of these factors it is just and equitable for there to be a variation in the CSLE for the scheme. The relative difference in lot entitlements recognises that the factors stated above do not impact on how much each lot should contribute to certain body corporate costs (such as secretarial fees, audit fees, printing, postage and outlays), but the structure of the scheme and the features and characteristics of the lots result in a different burden on some costs of the body corporate for repair and maintenance of the common property.

When allocating the lot entitlements to be included in the CSLE, each of the factors stated above impacts on the allocation in the following ways:

1. STRUCTURE OF THE SCHEME

The Scheme is not part of a layered scheme and does not have mixed use lots, therefore the structure of the scheme does not affect the CSLE.

Different lots in the scheme utilise common property to a greater extent depending on their location in the scheme. For example some lots do not have access to or, because of their location, do not use the lifts as much as others.

2. NATURE, FEATURE AND CHARACTERISTICS OF THE LOTS IN THE SCHEME

The body corporate is responsible for the repair and maintenance of common property within the scheme. This includes the recreation facilities, foyers, lifts, external walls and windows, roof, utility infrastructure and utility services. In allocating the CSLE the following features or characteristics of lots in the scheme increase the burden that the lot places on the body corporate expenditure for maintenance, cleaning and repair of the common property on the following basis:

- (a) the level of the building on which the lot is situated. Additional entitlements are rated depending on the level the lots is located in the building. The higher the lot in the building, the higher the cost of maintaining, cleaning and repairing windows and external walls and the higher the cost of maintaining and operating the lifts;
- (b) the gross floor area of the lot. Additional entitlements are added depending on the size of the lot. The larger the lot the greater demand on support and shelter costs;
- (c) not all lots are expected to have the same number of occupants. Larger lots can cater for greater number of occupants and have the potential to place a greater burden on common property and additional entitlements are added to reflect this.

3. THE PURPOSE FOR WHICH THE LOTS ARE USED

Each of the lots in this scheme is used for a residential purpose except for the manager's lot and consequently this factor does not contribute any differences to the lot entitlements.

SCHEDULE B	EXPLANATION OF THE DEVELOPMENT OF SCHEME LAND
-------------------	--

Lots may be amalgamated or subdivided provided there is no change to the common property and lot entitlements are fully allocated amongst the new lots.

SCHEDULE C	BY-LAWS
